STEVEN LANTZ

SOFTWARE ENGINEER

STEVEN.LANTZ@HEPCATMEDIA.COM – 336-337-7658

OBJECTIVE

To find a Software Engineering role at a company using a variety of technologies to achieve their goals. In an environment where I can continue to grow my skillset.

SKILLS

.NET, RESTful Services, SOAP Services, MVC, ASP.NET, XML, HTML, JavaScript, SQL, Oracle, Visual Studio, Visio, MS-SQL, Ariba, .NET Core, Full Stack Development, JSON, some AWS exposure.

EDUCATION

BA, Finance
August 1993
College of St. Francis

LEADERSHIP

Chairman of the Historic Preservation Commission of Oak Ridge, NC.
Beautification Commission of Oak Ridge, NC.

EXPERIENCE

SR. SOFTWARE ENGINEER • GENERAL DYNAMICS INFORMATION TECHNOLOGY • MAY 2001 – PRESENT

Full Stack Development of Client-facing and Intranet Web Applications and RESTful, as well as SOAP, Services. Worked primarily in Microsoft Visual Studio with .NET technologies with an Oracle database.

- Used Inbound XML and RESTful Services in MVC, ASP.NET to integrate ADP/Walgreens with our platform
- Used Inbound JSON and RESTful Services in MVC, ASP.NET to integrate AT&T and Aon with our platform
- Used Inbound JSON and Web Services in ASP.NET to integrate Leslie's Poolmart and Hibbett Sports to the ICIMS platform and our platform.
- Built SOAP Web Services in ASP.NET to handle all back-end elements of our platform including reporting, scoring, logging, maintenance tasks and data consolidation.
- Built and maintain internal ASP.NET based Web Applications, some MVC, that service the creation of online assessments, customer access and configuration, and data retrieval and analysis
- Participated in the moving of all infrastructure, applications and data to new data centers, on two separate occasions with minimal customer down time.
- Built SCORM Certified web training (HTML, JavaScript, CSS) for Pharmaceutical companies like Bayer, GlaxoSmithKline and Pfizer.
- Built an employee coaching interface for Verizon's sales force as part of a union settlement, using JSP and Oracle. The engine took real-time sales data and chart it against coaching efforts to determine employee growth.

E-LEARNING DEVELOPER – SIGNATURE CONSULTANTS • NOVEMBER 2000 – MAY 2001

Developed e-learning solutions using web-based technologies such as SCORM Compliant, HTML, JavaScript, CSS. Utilized back end technologies such as JSP, Classic ASP and MS-SQL Database.

- Built SCORM Certified web training (HTML, JavaScript, CSS) for Pharmaceutical companies like Bayer, GlaxoSmithKline and Pfizer.

WEB DEVELOPMENT LEAD • BA PORT •

JANUARY 2000 – NOVEMBER 2000

BA Port was a startup company developing an online small-mid business accounting software partnered with Dell Small Business. I managed both the US and India based development teams, working on a near 24-hour development cycle, developing a rich content Microsoft web-based application. It used HTML, IE 5.5 specific features, COM objects and MS-SQL

- Managed team deadlines and project tasks
- Lead daily SCRUM and Triage meetings to manage daily workload and priorities
- Managed Source Safe source control with labeling and build management.

WEB DEVELOPER • TRADESTATION SECURITIES •

APRIL 1997 – JANUARY 2000

My responsibilities were with the development and maintenance of the company web site including an extensive customer support component.

- Built Classic ASP and MS-SQL customer facing support website for both the stock trading application and the options analysis tools application

INTERNET PROJECT MANAGER • PCQUOTE, INC •

APRIL 1994 – MARCH 1997

Began as technical support but by the Fall 1994, when the commercial Internet was breaking open, moved into a role of lead for Internet technologies. Facilitated the launch the of the world's first real time stock quote system on the Internet as well as many of the stock exchange integrations with our data feeds.

- Used HTML and CGI-BIN objects written in C++ to create MarketSmart which was the first real-time stock quote system available to the public on the internet.
- Managed the integration of the ASE, PSE, NYSE to receive web-based data feeds for integrity testing
- Managed the Microsoft relationship that lead to MarketSmart being included as core icon in the Windows 95 launch.
